906 High Street | Bath, ME 04530  
(803) 312-2894 | [www.briancribb.com](http://www.briancribb.com)  
[brian.cribb@gmail.com](mailto:brian.cribb@gmail.com)

### Objective

*Seeking a front-end web development position, preferably with some remote work.*

### Work Experience

#### *Front-end Web Developer*

6/2013 – Present | Auto Europe, Portland, ME

- Javascript and CSS architecture, constantly pushing for the future
- UI development and design.
- Customized use of jQuery UI and other libraries for complex site data.
- Troubleshooting and debugging of existing front-end codebase.
- Development for the Mura CMS.

#### *Web Developer*

11/2012 – 5/2013 | L.L. Bean, Freeport, ME

- Maintaining and improving site login functionality.
- Collaborating with other developers in person and remotely to share ideas and improve code.

#### *Front-end Web Developer*

2/2012 – 11/2012 | Country Home Products, Vergennes, VT

- Maintenance and development for the company's website. Since most of our customers are older users, all JavaScript and CSS needed to be workable in pre-9 versions of Internet Explorer.

#### *Front-end Web Developer*

2/2011 – 2/2012 | Colonial Life, Columbia, SC

- Ongoing development for the pre-existing intranet and the new CMS.
- Front-end Development for the new Sitecore CMS to be launched in 2012, including jQuery solutions and XSLT renderings for the CMS.

#### *Graphic Designer, Content Administrator, Candy Photographer*

6/2010 – 2/2011 | Candy.com, Weymouth, MA

- Performed content editing and maintenance for the company CMS.
- Designed marketing materials, designed and launched HTML mass emails to subscribers.
- Photographed candy products for use in the company's online store.

#### *Web Consultant*

1/2010 – 5/2010 | Spin 350, Boston, MA

- Migrated BIDMC's internal site to a new Sitecore CMS.
- Extensive HTML work was performed to restructure the old content to fit the new design.
- Managed content through the Sitecore, and through Sitecore's Media Library.

#### *Web and Database Designer, Digital Printer Operator*

9/2006 – 3/2009 | Full-Time Staff, College of Charleston, Charleston, SC

- Built and maintained departmental sites for the Department of Business and Auxiliary Services, including the *Parking Department*, the *Copy Center* and *Cougar Card Services*. Maintained current web standards, working in conjunction with the I.T. and Marketing departments to ensure brand consistency with other departmental sites.
- Built a Microsoft Access database application to track inventory and revenue for the College of Charleston Copy Center.

## **Skills**

### *Web Applications and Code*

- JavaScript (including jQuery, Underscore and other libraries)
- ReactJS
- HTML5, CSS, Sass/LESS
- Responsive Design
- Wordpress with some PHP
- ColdFusion
- Familiar with the Mura CMS and its development requirements
- JSON, XML and XSLT

### *Adobe Creative Suite*

- Photoshop
- Illustrator

## **Education**

### *Self-Education*

1998- Present

- Like most web developers, I learned most of my skills on my own time, outside of work. It's not just something I do for the job. I learn for fun. I can always be found with a tech manual of some kind.

### *Courses Taken to Update Skills*

1/2004 - 1/2007, Trident Technical College, North Charleston, SC

- Various courses taken in web programming and visual design. They didn't have a web development program, but they did offer some design classes and one or two programming classes.

### *Associate Degree in Commercial Graphics*

12/1998, Midlands Technical College, Columbia, SC

- I was trained to run a printing press as well as design for one. Print and Web are total opposites in some ways, but they do have some overlap.
